Study Programme: BSc in Ecology

Degree level: Bechelor degree

Course Title: Ecotoxicology

Professor: Ivana Teodorovic

Elective Course

Number of ECTS: 6

Prerequisites: -

**Course Objective:** Providing comprehensive overview of the wide range of different toxic pollutants, their environmental fate and mode-of-action on individual, population and ecosystem level.

**Course Outcome:** Successful students will gain solid knowledge on toxicokinetics of the wide range of different toxic pollutants and will be skilled to independently conduct toxicity test on selected battery of standardized aquatic laboratory species, to process and analyse results using software packages and interpret data.

## **Course Content:**

Theoretical part Scope, aims, basic terms, principles and postulates in ecotoxicology. Methods used in ecotoxicology: In vivo, in vitro tests, acute and chronic toxicity tests, laboratory tests, mikro and mezocosms systems. Sublethal effects. Biomarkers. Statistical analysis, data processing and analysis using selected software packages. Regulatory aspect of aquatic toxicology. Mode – of – action and environmental fate of heavy metals, cyanides, ammonia, sulphides, phenols, PAHs, PCBs, PCDD/Fs, pesticides. Ecological factors affecting bioavailability, toxicity and environmental fate of toxic pollutants in aquatic ecosystems. Regulatory aspect of ecotoxicology: Risk assessment of bulk chemicals, plant protection products, biocides.

Practical part Laboratory culturing of standard test organisms. Acute toxicity tests using microorganisms (Vibrio fischeri, Pseudomonas putida), invertebrates (Daphnia magna, Folsomia sp, Synella sp.) and fish (Danio rerio). Chronic toxicity testing: algae and higher plants assay (Lemna minor, Myriophyllum aquaticum). Statistical analysis, data processing (specific softwares) and data interpretation.

## **Reading List:**

- 1. Teodorovic, I. Ecotoxicology (CD textbook)
- 2. Teodorovic, I., Mauric N. (2003): TesTox, ver. 1.0, software
- 1. Milosevic, Z. Vitorovic, M. (1992): Osnovi toksikologije sa elementima ekotoksikologije. Naucna kniga Beograd.
- 2. Hoffman, D.J., Rattner, B.A., Burton, G.A. Jr., Cairns, J. Jr. (eds.) (2002): Handbook of Ecotoxicology. CRC Press, Lewis Publishers, Boca Raton, Florida, USA. (selected chapters)

<b>Total hours:</b>					
Lectures: 3	Practicals: 3	Other:1	Student research work:5		

## Methods of instruction:

Lectures, practical exercises, laboratory demonstrations, computing exercises, database and software practice, homework – essays and presentations

Assessment (maximum number of points 100)					
Requirements	points	Final exam	points		
Active participation in lectures	5	Written exam	50		
Active participation in practicals	5	Oral exam			
Essay	10				
Pre-exam testing	30
