

Study programme: Bachelor with Honours in Geography Teaching
Level: Bachelor with Honours
ECTS: 16
Prerequisites: passed all exams according to the foreseen plan of the study programme
Goals of Graduation Thesis: Production of a research study that represents research in Geography i.e. in topics related to Geoinformatics and Geoecology. The study assumes exploitation of the up-to-date research methodology and data analysis, as well as references to the appropriate domestic and international literature resources.
Expected outcomes: Outcome of the thesis would be a production of an original scientific work, whose results should significantly contribute to a later more detailed and comprehensive scientific research of a given discipline or geographic area. Preparing the graduate students for the role of a teacher of Geography in primary and secondary education, and acquiring the appropriate competences to work in educational and scientific institutions.
General contents: Graduation thesis represents a student's research work where he/she meets the methodology of research in the field of geography. After conducting research, the student prepares a graduation thesis that contains the following chapters: Introduction, Theoretical part, Experimental part, Results and Discussion, Conclusion, Bibliography. Topics and content of the graduation theses that would be produced and defended within the study programme of Bachelor with Honours in Geography Teaching could cover more scientific fields and disciplines: <ul style="list-style-type: none"> - Methods of teaching geography - Physical Geography - Human Geography - Regional Geography - Educational Psychology and Ethics
Methods: Required oral defence of the thesis before the official Evaluation Board.
Grade (maximum number of points is 100)
