

Study programme(s): Teaching Informatics (IC)			
Level: master			
Course title: School practice (code: IA425)			
Lecturers: Miloš Racković, Mirjana Ivanović, Dragan Mašulović, Zoran Budimac, Miloš Stojaković, Đura Paunić, Srđan Škrbić, Vladimir Kurbalija, Miloš Radovanović, Danijela Boberić Krstićev, Danijela Tešendić, Bojana Dimić Surla			
Status: elective			
ECTS: 6			
Requirements: none			
Learning objectives To prepare students for teaching informatics in primary and secondary schools. Students will become familiar with the current school curriculum as well as with the content of the informatics subjects in primary and secondary schools (vocational schools and grammar schools of different orientations).			
Learning outcomes Students should be able to prepare for the class on their own and to convey their knowledge to the primary or secondary school students.			
Syllabus The course contains the following topics: 1. Introduction to the contents of the subject of Informatics in primary and secondary schools through the current curriculum; 2. Organisation of the class in schools and the appropriate documentation (timetable, diary); 3. Annual teaching plan; 4. Instructions and checking students knowledge; 5. Giving final marks; 6. Preparation for the class in various fields of informatics; 7. Performance of practical teaching in chosen schools in Novi Sad.
