

<b>Study programme: Bachelor with honours in Geography Teaching</b>				
<b>Course title: Regional Geography of Asia and Africa</b>				
<b>Teacher(s): <a href="#">PhD Gordana Jovanović</a></b>				
<b>Status: compulsory</b>				
<b>ECTS: 7</b>				
<b>Requirements:</b> passed subjects in Physical and Human Geography from the first and second year of study				
<b>Learning objectives</b> Learning objectives covers students' introduction to elementary regional development of countries on territories of Asia and Africa as well as development of the previously mentioned continents themselves through the prism of physical-geographic and socio-geographic characteristics. Further, to be able to point out certain regions of the continent as well as particular geographic regions within the countries of Asian and African continent.				
<b>Learning outcomes</b> Application of students' acquired knowledge in geographical disciplines by means of synthetic method on the example of continents (Asia and Africa) and the countries.				
<b>Syllabus</b> <i>Theoretical instruction</i> Overall geographic presentation of Asia and Africa as a continent, through their geological structures, relief, climatic characteristics, with special insight into economic growth and influence between the regions and countries, as well as their inhabitants through the prism of ancient civilizations and dominant religions. Regional geographic areas of Asia and Africa, as well as the regional geographic parts of all countries on the two continents mentioned, with a special insight into physical-geographic and social-geographic characteristics.  <i>Practical instruction</i> Practical usage of study units represented in thematic charts and diagrams by filling out the Practice Forms created for this subject. Elaboration of written assessments with topics strictly connected with regional analysis, as well as with regions and countries of Asia and Africa as a continent.
