

Geography Teaching Methodology Research Group

Geography teaching, Teaching innovations, Teachers

The group does the research in different segments of teaching methodology in geography: methods and techniques of work, teaching principals, contemporary teaching, innovations in teaching, activation in teaching and historical development of geography teaching, teaching objects and tools, professional development of the teachers, etc.

Members of the group are, within the Society of Subject Didactics, members of the geography subject section and participated in several national and international conferences on the teaching methodology topic.

Group members are as well involved in the work of the Institute for the Promotion of Education as assessors for the professional evaluation of the quality of manuscripts of textbooks and monitoring and evaluation of the results of using textbooks in educational work. Group members are engaged:

- as textbooks reviewers for the subject of geography for primary and secondary school
- in giving an expert opinion to the National Education Council
- as the members of Licensing Commission at the Provincial Secretariat for Education
- as the proofreaders of professional and scientific works.
